

VOLUNTEERS WANTED

Tell us about where you live

We are looking for disabled people to tell us what they like and dislike about where they live; what affects your life in and around your home?

Stigma is when someone is treated unfairly because of what other people believe about them

This project will help us find out more on how to tackle stigma

We will make a guide to help stop stigma and unfairness

All travel costs and other expenses covered

We want to know more about how stigma can affect older disabled people getting around their homes and neighbourhoods

45+

We are looking for volunteers aged over 45 who are living with additional barriers or a disability – this can range from arthritis to wheelchair users. Everyone who is interested is welcome to get in touch

We would like you to tell us about what you like and dislike about where you live. You would also keep a diary about your neighbourhood. For example, telling us how you travel. You can choose how to do this. For example, photos, voice recording or writing it down

Why volunteer with us?

Get a certificate for taking part in training

Experience working as part of a research team

Learn new skills which you can add to your CV

How do I find out more and get involved?

If you want to get involved, contact Dr Dianne Theakstone
